Page Analysis

⚠ Title Tag

Title tag may truncate or read short. Adjust the copy so the main topic and value are clear in search results.

47 CHARS

Preplyx | Your Personal Exam Preparation System

Aim for 50-60 characters. Put the main topic near the front, keep the title unique, and move brand or secondary details after the core value.

[Learn how to optimize title tags.](#)

⚠ Meta Description

Meta description may truncate. Put the main value earlier so the snippet still works in search results.

195 CHARS

Preplyx is a personal exam preparation system that helps students know what to study, practice effectively, understand their mistakes, and improve before exam day. Built for JAMB, WAEC, and NECO.

Keep it concise, ideally 135 characters or less for this check. Lead with the page's main value so the snippet still works if search results truncate it.

[Learn how to write meta descriptions.](#)

✓ ALT Attributes

All images include alt text, helping search engines and screen readers understand image content.

0 MISSING

All 2 checked images include alt text.

i Text/HTML Ratio

Text/HTML ratio was calculated. Use it as a rough content-to-code signal, not an SEO score.

9.0%

Text/HTML ratio: 9.0%; HTML: 64.0 KB.

✓ Heading Structure

Heading structure is clear, so readers and crawlers can follow the page hierarchy.

PROPER

Headings: 1 H1, 6 H2, 13 H3.

✓ URL

URL is clean and easy for users and search engines to understand.

14 CHARS

<https://preplyx.com.ng/>

i Keyword Density

Keyword density was calculated. Use it to see which terms dominate the page, not to hit a target percentage.

2.3%

practice appears 20 times in 854 visible words.

Internal Links

Internal linking needs review. Check thin coverage, nofollow links, redirects, or excessive linking. Eligible link checks are incomplete or inconclusive. Use Check status in the Links report to check eligible URLs.

16 LINKS

Internal links: 16; unique URLs: 1; checked: 0; broken: not checked.

Use internal links to connect related pages and help users continue into relevant next topics. Review anchor text and broken targets in the Links report.

[Learn how to use internal links.](#)

Mobile Compliance

✓ Viewport Meta Tag

Meta viewport tag is implemented, so the page can scale properly on mobile devices.

SET

Viewport: width=device-width, initial-scale=1.0

✗ Responsive Design

Responsive design was not detected. Add responsive layout rules so the page works across screen sizes.

MISSING

Viewport: width=device-width, initial-scale=1.0; responsive rules detected: 0.

Check key templates at common mobile widths so text, navigation, images, and tap targets stay usable without horizontal scrolling.

[Learn how to improve mobile SEO.](#)

Technical Compliance

✓ HTTP Status

HTTP status is successful, so users and crawlers can access the page.

200

200 OK

✓ XML Sitemap

XML sitemap is reachable, helping search engines discover important URLs.

FOUND

<https://preplyx.com.ng/sitemap.xml>

✓ Robots.txt

Robots.txt allows the current URL, so crawlers can access this page.

ALLOWED

<https://preplyx.com.ng/robots.txt>

✓ Meta Robots

Meta robots directives allow indexing, so search engines can index your content as intended.

INDEXABLE

Meta robots tag not present; default behavior is index, follow.

✓ HTTPS

Page resolves to HTTPS, so the URL uses a secure protocol.

SECURE

Final URL: <https://preplyx.com.ng/>

✓ X-Robots-Tag

Server-level robots directives are clear, so this page is not blocked by response headers.

INDEXABLE

X-Robots-Tag header: not present.

✓ Mixed Content

No mixed content was detected, so secure pages and assets load cleanly.

NONE

Insecure resources: 0.

! HSTS

HSTS header is missing or weak. Strengthen it after confirming HTTPS works across the site.

MISSING

Strict-Transport-Security: none.

HSTS tells browsers to use HTTPS for future visits. Treat it as advanced security hardening, and add it only after HTTPS works reliably across the site.

[Learn more about HTTPS and site security.](#)

✓ Page Size

Main page payload is within the target range.

0.39 MB

Main page payload: 0.39 MB.

✗ Canonical

Canonical is missing or conflicting. Add one clear canonical URL to guide search engines.

MISSING

No canonical link tag was found.

Use one canonical URL that points to the preferred version of the page. Avoid pointing canonicals to redirects, blocked URLs, or unrelated pages.

[Learn how to set canonical URLs.](#)

✓ Language Declaration

Language declaration is present, so browsers and assistive technologies can interpret the content correctly.

EN

<html lang="en">

✓ Favicon

Favicon was found, making the site easier to recognize in tabs, bookmarks, and search surfaces.

FOUND

<https://preplyx.com.ng/favicon.svg>

! Schema.org Markup

Structured data is missing or limited. Add relevant schema to clarify the page content.

NONE

Structured data types: none.

Schema is structured data that helps search engines understand your page and can make it eligible for rich results. Mark up visible content and test before publishing.

[Learn how to add schema markup.](#)

! Hreflang

No hreflang tags were found. This is fine for single-language sites, but review if you target multiple regions.

0 TAGS

Alternate languages or regions detected: none.

Use hreflang only for alternate language or regional versions. Each alternate should reference the others and include a self-referencing tag.

[Learn how to set up hreflang.](#)

! Google Analytics

Analytics tracking was not detected. Add tracking if you need traffic and engagement data for this page.

MISSING

Detected IDs: none (GA4, UA, or GTM).

Use GA4 to connect page-level SEO checks with traffic and engagement data. Confirm the tag is installed once, fires correctly, and respects your tracking setup.

[Learn how to get started with GA4.](#)

✓ Noindex Tag

No noindex directive was found, so this check does not block the page from indexing.

INDEXABLE

Meta robots: none; X-Robots-Tag: none.

Encoding	UTF-8
Doctype	HTML5
HTML Size	1 KB
HTTP Headers	alt-svc, cf-cache-status, cf-ray, content-encoding, content-type, date, last-modified, nel, priority, report-to, server, server-timing, vary
